He made going to a 3 hour Friday lab enjoyable. He was always available to help and made me actually want to do well in the class. Extremely helpful and easily my favorite lab TA I have had n/a

Rajat was super nice and genuinely cared for his students.

Rajat was very friendly and helpful in all of our experiments. He was patient and answered all of our questions and even went out of the way to explain concepts that we didn't understand. He is definitely the best TA I have had in any of my courses so far.

He was very enthusiastic in his teaching while simplifying material into chunks which made it easily digestible. Always circulating lab to check up on how we were progressing and answer any questions we had. Very friendly and easy to get along with

Super helpful when asked a question. Explained answers better than the professors. Super helpful, and awesome person.

Rajat was a great TA. If you ever had a question he would sit down next to you and explain it to you in a slow and understanding manner. He really tried to help us understand not just how to do the lab but why we were doing the lab and what was actually taking place. Would without a doubt recommend him to anyone taking Chem 238.

Very helpful, it's clear he loves what he is doing!

Rajat is super nice and made me feel confident in lab.

Rajat was always willing to give a thorough explanation of the material. If we asked a question he was more than willing to give us a clear answer. He is probably the best and most enthusiastic lab instructor I've ever had.

He could grade our assignment a little faster
He couldn't speak clear English, so it was hard to understand him when you asked questions. Also, whenever you did ask questions or he corrected you on something, he yelled at you (like he was mad and frustrated with you). There were also multiple times I tried to ask him a question about lab material or procedure and he refused to answer my question. Whats the point of having a TA if they will not help you.
I feel like he did a great job of explaining any concepts, lab procedures, and safety concerns before lab. Always available to answer questions, and did so willingly and without making anyone feel "stupid". Enforced all lab rules
He could grade a little faster, but it is understandable if he cannot.

16. Please feel free to make any additional comments regarding this course or your instructor.

Text Response
This instructor is phenomenal. No matter how stupid the question was, he answered it. He could have just explained the procedure, but when asked "What did you say?", whether he wanted to answer or not, he still managed to explain thoroughly each step. WHAT A GREAT INSTRUCTOR! HIGHLY RECOMMEND HIM TO THE NEXT GENERATION OF AGGIES!
handwriting was rather difficult to understand. when i got my lab reports back, i could not read the comments he wrote when marking off points
I know lab is supposed to apply what u learn and already know, but many students as will as I feel as if we don't gain anything from lab. Get really understand what we were supposed to be getting out of the whole thing. There should be some kind of review sheet or overview of the reaction or tests that we were supposed to understand.
Best lab TA I've had here at A&M, by far!
Great TA!!
